**FOR IMMEDIATE
RELEASE**

The Palmdale Aerospace Academy announces Website

The Palmdale Aerospace Academy (TPAA) has launched a temporary website for community information and participation. This effort backed by the Palmdale School District, the City of Palmdale, and the AERO Institute. Matthew Winheim, STEM coordinator for the Palmdale School District, is quoted as saying, "This is a very exciting endeavor for the community of Palmdale. And building a cutting-edge academy like this will need support from all stakeholders-parents/guardians, educators, city leaders, industrial experts. If they're willing to contribute to the prosperity of our students, we have a place for them at this academy."

Also contained in the website is information about charter schools and elements in the world of education that are key themes within this academy's approach to education. Links to describe project based learning, Common Core State Standards, and the Partnership for 21st Century Skills are available for community members.

The website has been designed as an informational portal for interested community members as well as a way for the community to contribute to the academy's design and start-up. Interested parties are encouraged to send their information to TPAA leadership via the weblinks in the news column.

Visit <http://www.palmdalesd.org/Domain/396> to view the website.
